Page 1 of 1

Transport Criteria Based on ALS Evaluation of Signs or Symptoms

*Positive Symptoms	§Automatic Transport Criteria	+20-Minute Transport Criteria
<ul style="list-style-type: none"> Headache Dizziness Nausea/vomiting Vision abnormalities Paresthesias (numbness and/or tingling) 	<ul style="list-style-type: none"> Chest pain Confusion Shortness of breath Palpitations or irregular heart beat sensations 	<ul style="list-style-type: none"> Any Automatic Transport Criteria Any Positive Symptoms HR 120 or greater SBP 200 or greater OR 90 or less T101 or greater OR 97 or less RR 30 or greater CO level greater than 10% SpO₂ level less than 94

NOTES:

- After the first air bottle, the entire crew must report to rehab if any member reports positive symptoms. Symptomatic crewmembers must remain in rehab; other nonsymptomatic crewmembers are to report as directed by Group Supervisor.
- The Incident Safety Officer is responsible for assessment of the Company Officer for positive symptoms.
- Document according to department standards: date and incident identifier; names of personnel triaged; entrance and exit times; all vital signs documented; injuries and/or symptoms; disposition.
- Rehydration should continue after the incident with additional 1–2 liters consumed over the next 4 hours.
